

PRAXISKLINIK  
FÜR DERMATOLOGIE  
AACHEN

## Welcome to the Dermatology and Allergy Center

### Your health is our top priority

Our staff and modern facility offer you a comprehensive set of the best available therapies for preventative and continuing individualized care of acute and chronic diseases.

### Specialist physician expertise in dermatology and allergy

Our specialist team possesses a breadth of expertise in dermatology, allergology, phlebology, dermatological oncology, dermatologic surgery, sexually transmitted diseases, and aesthetic-cosmetic dermatology.

### Diagnosis and therapy that fit your needs

Our staff use modern and targeted examination techniques to arrive at a specific diagnosis. Based upon 1.) the patient's personal situation and 2.) state-of-the-art evidence-based medical treatment guidelines, we discuss therapeutic options with the patient and then create an individualized therapy plan, regularly tracking its progress. This close-knit patient/physician relationship enables fine-tuning the therapy at every treatment stage. In cases where interdisciplinary diagnostics or therapy are needed, we gladly coordinate referrals and appointments with other specialists.

### Your time is important to us

Prompt diagnosis and treatment are essential, especially for acute diseases. We offer appointments within three working days and take special care to make sure you are promptly seen at your scheduled appointment time. For your added convenience, we schedule appointments between 07:30 and 19:00 and offer an [online appointment request](#) service.

### Health Insurance

Services are billed according to the most recent edition of the German Physicians' Fee Schedule (*Gebührenordnung für Ärzte*). These costs are reimbursed by private health insurances and government health care allowances. Alternatively, we also gladly provide costs estimates for patients who pay their own health care costs directly.
